Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 3, 4, 13, and 18 rejected under 35 U.S.C. 103(a) as being unpatentable over of European Patent No. 0422774 (cited by applicant) in view of Takagishi et al (US 5,982,737).

European patent discloses an optical disk which consists of a protective sheet which is affixed to the surface of the disk substrate and can be replaced by the user.

European patent discloses the claimed invention except for a second sheet with the same characteristic of the first sheet to be applied to the other side of the disk substrate opposite to the first sheet (Fig 2).

Takagishi et al disclose an optical disk which comprises a substrate, a recording layer, and first sheet (design A in Fig 1) applied over the recording layer, and a second sheet (design B, Fig 2) which has substantially the same physical characteristic as that of the first sheet applied the disk substrate opposite to the surface covered with the first sheet.

It would have been obvious to one of ordinary skill in the art to apply a second sheet with the same physical characteristic as the first sheet to the second side of the disk substrate of European patent disk as taught by Takagasi et al in order to have a

disk with two cover sheets on each side of the disk substrate which is affixed to the disk substrate and can be replaced by the user .

Allowable Subject Matter

Claim 19 is allowed.

Claims 2, 5-12, and 14-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
